A charming new story from the author of Guess How Much I Love You offers an original—and heartening—take on childhood anxiety. Once there was a girl called Mindi who was afraid of something that no one else could see. This thing that she was afraid of, this thing that of no one else could see, was a big goose. It came into her room as quietly as a thought comes into your head. . . . When a little girl named Mindi says she is being visited by a big goose—a scary creature that is visible only to her—her devoted dad and mom try everything they can think of to drive it away. But maybe some outside assistance is warranted from their wise friend Auster, a farmer who knows what is needed to help Mindi turn her mind to something new. In a sensitive exploration of childhood fears, Sam McBratney, the author of Guess How Much I Love You, narrates with charm, wit, and a touch of whimsy, while Linda O’lafsd ótir’s delicate illustrations enhance the modern fairy-tale feel in a story that is sure to become a bedtime favorite.

Forget the 10,000-hour rule—what if it's possible to learn the basics of any new skill in 20 hours or less? Take a moment to consider how many things you want to learn to do. What's on your list? What's holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills—time you don't have and effort you can't spare? Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That's why it's difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It's so much easier to watch TV or surf the web. . . . In The First 20 Hours, Josh Kaufman offers a systematic approach to rapid skill acquisition— how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You'll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch type on a nonstandard keyboard, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you're trying to achieve, and what you'll be able to do when you're done. The more specific, the better. Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it's easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you're performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, The First 20 Hours will help you pick up the basics of any skill in record time. . . . and have more fun along the way.

Let's face it—all birds are fascinating, wonderful, idiotic jerks—no matter where in the world they reside. Following in the footsteps of the bestselling book The Field Guide to Dumb Birds of North America, this hilarious sequel ventures beyond to identify the stupidest birds around the world. Featuring birds from North and South America, Africa, Asia, Europe, and Oceania, author Matt Kracht identifies the dumb birds that manage to live all over the freaking place with snarky, yet accurate, names and humorous, anger-filled drawings. This guide book details exactly how much these morons suck with facts about each bird's (annoying) call, its (stupid) migratory pattern, and its (downright tacky) markings. Complete with a matching game, bird descriptor checklist, tips on how to identify a bird (you can tell a lot by looking into a bird's eyes, for example), this profanity-laden book offers a balance of fact and wit that will appeal to hardcore birders and casual bird lovers (and haters) alike. A MUST-HAVE: A must-have sequel to the bestselling parody book The Field Guide to Dumb Birds of North America. UNIQUE & LAUGH-OUT-LOUD FUNNY. This is a great coffee table or bar top conversation-starting book. And a bonus, while the content is humorous, it is practical and useful! A GREAT PRESENT: This is the perfect gift for the bird lovers and haters in your life. It also makes a great Mother's Day, Father's Day, birthday, retirement, or gag gift. Perfect for: • Birdwatching and nature enthusiasts • Armchair birders (or nonbirders) • Someone who needs a quirky gift for an animal lover friend • People with serious birders in their lives who want something lighthearted
