This instructive, useful book, which can be used as a model for addressing ministries, church systems, and other non-profit organizations in conflict,

Online Library Conflict Resolution Survey

offers ways of constraining those who act as antagonists and ways of collaborating with opponents.

This volume contains a selection of the most notable contributions delivered at the

Online Library Conflict Resolution Survey

research conference "Industrial Relations and Conflict Management: Different Ways of Managing Conflict," which was hosted by the Netherlands School of Business in July 1980. Held at Nijenrode Castle, the

Online Library Conflict Resolution Survey

conference brought together an international gathering of thirty-five of the most distinguished scholars in these fields to present research papers and to engage in round-table discussions. One of the

Online Library Conflict Resolution Survey

principal aims of the conference was to explore cross-links and differences between the areas of conflict management and industrial relations in an international context. The book opens with a chapter by George

Online Library Conflict Resolution Survey

Strauss, who provides an introduction to and an overall view of the subject matter covered. The chapters that follow in Part I deal with differing conflict conditions and definitions and their

Online Library Conflict Resolution Survey

implications for managing conflict. The manifestations of conflict and different modes of conflict management are the subject of the chapters in Part II. In Part III, three empirical studies of conflict are dis

Online Library Conflict Resolution Survey

cussed. Part IV is concerned with comparative industrial relations, while value issues and conflict are the focus of Part V. Finally, in the Epilogue the participant feedback regarding the conference is

Online Library Conflict Resolution Survey

reviewed.

Focuses on the constructive nature of conflict and stresses conflict management as opposed to conflict resolution. Presents a comprehensive view of organizational conflict.

This book explains the causes, process, and results of group disputes in urban communities (the empirical experiences from Shanghai) in China. It explores the means and characteristics of as well as the differences in conflict resolution in various forms of state–society relations,

Online Library Conflict Resolution Survey

particularly the ways of dealing with and resolving disputes concerning mass incidents involving government interests in China's current social transformation period. It also analyzes how people's mediation organizations interact with the local government when managing and defusing collective disputes. Combining

Online Library Conflict Resolution Survey

the relevant theories and five conflict resolution measurement models created by Blake and Mouton (1964), this book explains the current interaction model and cooperation mechanism between the state and social organizations in China. To do so, it examines the role of the Lin Le People's Mediation Workroom in

Online Library Conflict Resolution Survey

dealing with community collective disputes and the respective action strategies and constraints. The book argues that the current state–social relations in China are not centered on society or the state, but on “state-led social pluralism.”

Disputes between peers as well as

Online Library Conflict Resolution Survey

between supervisors-subordinates happen numerous times a week in the corporate environment. Although the win-win concept is the ideal orientation, the notion that there can only be one winner is constantly being reinforced in some cultures. This kind of mentality can be destructive when communicating with

Online Library Conflict Resolution Survey

different cultural groups by creating barriers in negotiation, resolution, and compromise; it can also lead the "loser" to feel mediocre. When the win-win orientation is absent in negotiation, different responses to conflict may be observed. Strategic Approaches for Conflict Resolution in Organizations:

Online Library Conflict Resolution Survey

Emerging Research and Opportunities provides emerging research on approaches for conflict resolution in organizations whereby it is possible to establish congenial ambiences in different organizations, leading to better outcomes and performance. Featuring coverage on a broad range of topics such

Online Library Conflict Resolution Survey

as organizational change, leaderships roles, and organizational change, this book is ideally designed for managers, human resources officials, executives, researchers, scholars, professors, industry professionals, and students interested in the current research behind the reduction, elimination, and

termination of all forms of organizational conflict.

Online Library Conflict Resolution Survey

hodgepodge of sources varying in quality and presentation to provide an overview of a particular idea. This work is designed to serve as a core reference for anyone interested in the essentials of

Online Library Conflict Resolution Survey

contemporary management theory. Drawing together a team of international scholars, it examines the global landscape of the key theories and the theorists behind them, presenting them in the context

Online Library Conflict Resolution Survey

needed to understand their strengths and weaknesses to thoughtfully apply them. In addition to interpretations of long-established theories, it also offers essays on cutting-edge research as one might

Online Library Conflict Resolution Survey

find in a handbook. And, like an unabridged dictionary, it provides concise, to-the-point definitions of key concepts, ideas, schools, and figures. Features and Benefits: Two volumes containing over 280

Online Library Conflict Resolution Survey

signed entries provide users with the most authoritative and thorough reference resources available on management theory, both in terms of breadth and depth of coverage. Standardized

Online Library Conflict Resolution Survey

presentation format, organized into categories based on validity and importance, structures entries so that readers can assess the fundamentals, evolution, and impact of theories. To ease

Online Library Conflict Resolution Survey

navigation between and among related entries, a Reader's Guide groups entries thematically and each entry is followed by Cross-References. In the electronic version, the Reader's Guide combines with

Online Library Conflict Resolution Survey

the Cross-References and a detailed Index to provide robust search-and-browse capabilities. An appendix with a Chronology of Management Theory allows readers to easily chart directions and trends in

thought and theory from early times to the present. An appendix with Central Management Insights allows readers to easily understand, compare, and apply major theoretical messages of the

Western countries have been frequent, frequently violent, largely intra-state, and protracted. But what do we know about conflict management and resolution strategies in these societies?

Have the dominant Western approaches been transplantable, suitable, effective, durable, and sustainable? Would conflicts in non-Western societies be better handled by the

Conflict Management Strategies: Global Perspectives is offered as a global compendium on indigenous conflict management strategies. It presents diverse perspectives on the subject.

Fully aware of the tendency in the literature to over-generalize, over-romanticize, and over-criticize the localized and customary mechanisms, the book takes a slightly different approach. It presents

a variety of traditional conflict management approaches as well as several cases of the successful integration of the indigenous and Western strategies in the contemporary period. The main features,

strengths, challenges, and weaknesses of a multitude of indigenous systems are also presented.

Strategic Approaches for Conflict Resolution in Organizations: Emerging Research and Opportunities A Guidebook

Throughout history, there

Online Library Conflict Resolution Survey

has been conflict and the clashing of ideas. Although this has assisted in creating political and societal structures, it has also led to civil unrest, cases of severe discord, and war. Political Mediation in

Online Library Conflict Resolution Survey

Modern Conflict Resolution: Emerging Research and Opportunities is a critical scholarly resource that examines the pursuit of peace in global civil war and conflict through the use of mediation. Featuring

Online Library Conflict Resolution Survey

coverage on a broad range of topics, such as intercultural communication, social psychology, and conflict theory, this publication is geared towards academicians, students, and researchers

Online Library Conflict Resolution Survey

seeking relevant and current research on governmental approaches to pursuing peace in instances of conflict and strife.

This book brings together over 40 papers presented at the 1992 International

Online Library Conflict Resolution Survey

Construction Conflict Management & Resolution Conference held in Manchester, UK. Six themes are covered, including alternative dispute resolution, conflict management, claims

Online Library Conflict Resolution Survey

procedures, litigation and arbitration, international construction, and education and the future. With papers from arbitrators, architects, barristers, civil engineers, chartered surveyors and solicitors,

Online Library Conflict Resolution Survey

this book represents the first multi-disciplinary body of knowledge on Construction Conflict and will act as a unique source of reference for both legal and construction professionals.

Online Library Conflict Resolution Survey

New ways of managing conflict are increasingly important features of work and employment in organizations. In the book the world's leading scholars in the field examine a range of innovative alternative

Online Library Conflict Resolution Survey

dispute resolution (ADR) practices, drawing on international research and scholarship and covering both case studies of major exemplars and developments in countries in different parts of the global economy.

Online Library Conflict Resolution Survey

Developments in the management of individual and collective conflict at work are addressed, as are innovations in both unionized and non-union organizations and in the private and public sectors.

Online Library Conflict Resolution Survey

New practices for managing conflict in organizations are set in the context of trends in workplace conflict and perspectives on how conflict should be understood and addressed. Part 1 examines the changing

Online Library Conflict Resolution Survey

context of conflict
management by addressing the
main frameworks for
understanding conflict
management, the trend in
conflict at work,
developments in employment
rights, and the influence of

Online Library Conflict Resolution Survey

HRM on conflict management. Part 2 covers the main approaches to conflict management in organizations, addressing both conventional and alternative approaches to conflict resolution. Conventional grievance

Online Library Conflict Resolution Survey

handling and third-party processes in conflict resolution are examined as well as the main ADR practices, including conflict management in non-union firms, the role of the organizational ombudsman,

Online Library Conflict Resolution Survey

mediation, interest-based bargaining, line and supervisory management, and the concept of conflict management systems. Part 3 presents case studies of exemplars and innovators in the field, covering

Online Library Conflict Resolution Survey

mediation in the US postal service, interest-based bargaining at Kaiser-Permanente, 'med-arb' in the New Zealand Police, and judicial mediation in UK employment tribunals. Part 4 covers international

Online Library Conflict Resolution Survey

developments in conflict management in Germany, Japan, The United States, Australia, New Zealand, the United Kingdom and China. This Handbook gives a comprehensive overview of this growing field, which

Online Library Conflict Resolution Survey

has seen an huge increase in programmes of study in university business and law schools and in executive education programmes.

A transformational approach to conflict argues that conflicts must be viewed as

Online Library Conflict Resolution Survey

embedded within broader relational patterns and social and discursive structures. Central to this book is the idea that the origins of transformation can be momentary, situational, and small-scale

Online Library Conflict Resolution Survey

or large-scale and systemic. The momentary involves shifts and meaningful changes in communication and related patterns that are created in communication between people. Momentary transformative changes can

Online Library Conflict Resolution Survey

radiate out into more systemic levels, and systemic transformative changes can radiate inward to more personal levels. This book engages this transformative framework by bringing together current

Online Library Conflict Resolution Survey

scholarship that epitomizes
and highlights the
contribution of
communication scholarship
and communication-centered
approaches to conflict
transformation in personal,
family, and working

Online Library Conflict Resolution Survey

relationships and organizational contexts. The resulting volume presents an engaging mix of scholarly chapters, think pieces, and personal experiences from the field of practice and everyday life. The book

Online Library Conflict Resolution Survey

embraces a wide variety of theoretical and methodological approaches, including narrative, critical, intersectional, rhetorical, and quantitative. It makes a valuable additive

Online Library Conflict Resolution Survey

contribution to the ongoing dialogue across and between disciplines on how to transform conflicts creatively, sustainably, and ethically.
