Goes beyond traditional ‘job hunt strategies’ to provide innovative solutions targeted to specific populations This graduate text for courses in career counseling is distinguished by its emphasis on creative interventions tailored to the unique needs of diverse populations. With a focus on career as a cornerstone of personal identity, the book explores the specific meaning of careers within different cultures and examines the challenges faced by—and potential solutions for—individuals with diverse backgrounds and needs. It describes unique interventions that allow counseling students to visualize and actualize career counseling with a wide range of clients and demonstrates techniques targeted to each population that can be put into practice immediately. The text provides demographic information regarding specific job-seeking groups including such “traditional” populations as college graduates and working parents, as well as groups that encounter special challenges such as stay-at-home parents returning to work, formerly incarcerated individuals, people with disabilities, teen mothers, African American, Hispanic and Asian males and females, older adults, LGBT individuals, and many others. Over fifty creative, innovative interventions that have been successfully applied help counselors to provide effective career development strategies with each population. Chapters include a vignette representing each population, group demographics, a history of career paths and obstacles, unique needs of the group, supports already in place, and specific career counseling assessment and interventions. The book also provides abundant resources for additional study. In addition to its value to career counselors, the text will also be useful to personal counselors who often deal with their client’s career issues during treatment. Key Features: Provides in-depth exploration of underserved populations who hold unique career development needs Includes innovative career counseling interventions that move beyond standard ‘job hunt strategies’ or ‘resume preparation tips’ Explores life stage concerns related to career development across multiple diverse identities Gives readers step-by-step details on implementing over 40 innovative career counseling techniques Presents case studies that provide clear examples of the application of relevant interventions

R. K. Peet Dep. of Botany, University of North Carolina, Chapel Hill, N. C. 27514, USA Robert Whittaker's contributions to ecology were many and remarkably varied. His publication record will long stand as a monument to his greatness, and whatever we do to honor him will likely be rather small in comparison. Less well known were his personal interactions and the impact they had on the development of ecology as well as individual scientists. Over the years he touched many of us and we felt not just a professional but also a deep personal loss in his passing. After his death I was contacted by numerous colleagues who wondered what they might do to honor him. Whittaker had long served on the editorial board of Vegetatio, which prompted Eddy van der Maarel to suggest that a series of papers in the Journal might be a fitting memorial, and so this project was conceived. Whittaker was a master of synthesis and during his career he published numerous review papers which showed clearly how his work related to and built on that of others. For this reason it seemed inappropriate and redundant to solicit papers reviewing areas to which Whittaker made important contributions. Instead, I chose to solicit research papers illustrating current applications of approaches Whittaker developed and showing a few of the recent advances which have grown directly from his pioneering work.
